Conclusion

1. This application is in condition for allowance except for the following formal matters:
2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "at least one light conductive path permanently formed within and non-affixed on the exposed exterior surface of the helmet" as claimed in claim 1 or "a plurality of fiber optic conductors permanently formed within and non-affixed on the exterior surface of the shell" as claimed in claim 29 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Drawing 13 only depicts a fiber optic adhered to an exterior surface. Drawing 14 only depicts fiber optic adhered to an underside of the exterior surface 34. And finally Figure 15 only depicts a fiber optic molded within shell 102.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for

Art Unit: 2875

consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Reasons for Allowance

None of the prior art of record alone or in combination teaches or fairly suggest "at least one light conductive path permanently formed within and non-affixed on the exposed exterior surface of the helmet" as claimed in independent claim 1 or "a plurality of fiber optic conductors permanently formed within and non-affixed on the exterior surface of the shell" as claimed in independent claim 29. The prior art of record most similar to applicant's invention is taught by Shea, Sr. Shea, Sr. teaches that fiber optics can be molded into the exterior surface of a shell (see column 3, lines 33-34). This embodiment is very similar to applicant's figure 15. However, Shea, Sr. doesn't suggest a light conductor or fiber optic non-affixed on an exterior surface or exposed exterior surface as described in applicant's specification, page 20, lines 14+.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
